Web Development

Fast, Conversion-First Websites & Landing Pages

We design and build modern websites that load fast, rank well, and convert—powered by React/Next.js or WordPress, with clean APIs and Core Web Vitals tuning.

Core Web Vitals

SEO + Schema

GA4 + GTM

A/B-Ready

Built for performance, designed to convert

Everything we ship is measurable, maintainable, and marketing-ready.

**Lightning-Fast**

Sub-2.5s LCP, snappy interactions, and optimized assets.

**Mobile-First**

Designed for thumbs, tested on real devices, built to scale.

**SEO-Ready**

Semantic HTML, schema, redirects, XML sitemap, and clean URLs.

**Conversion-First**

Clear offers, frictionless forms, social proof, and CRO patterns.

**Secure by Default**

Hardened stack, headers, reCAPTCHA, and vulnerability checks.

**Easy to Manage**

Reusable sections, CMS handoff, and docs your team will use.

Our build process

Transparent from kickoff to launch—so you always know what's next.

**UX & Wireframes**

User flows, low-fi wireframes, and a flexible component grid that maps to your goals.

**Visual Design**

Brand-aligned UI, motion micro-interactions, and a modular design system.

**Build & Integrate**

React/Next.js or WordPress build, with APIs, CMS, forms, and analytics wired in.

**Optimize & Ship**

Core Web Vitals, SEO, accessibility, security hardening, then launch + monitor.

Tech we love

Modern, proven tools—chosen to match your team and roadmap.

Backend & Data

Strong foundations—clean APIs, reliable data, secure auth, and production-ready infra.

**API Layer**

- ✓ Node.js (Express/Nest)
- ✓ REST / GraphQL / tRPC
- ✓ Versioning & rate limits

**Data & ORM**

- ✓ Postgres / MySQL / Mongo
- ✓ Prisma / TypeORM
- ✓ Migrations & backups

**Auth & Security**

- ✓ JWT / OAuth / SSO
- ✓ RBAC & audit logs
- ✓ OWASP hardening

Automation & QA (Puppeteer)

Headless browser scripts for visual QA, flows, PDFs, and repeatable ops—safe and permissioned.

Visual QA

- ✓ Screenshots across breakpoints
- ✓ DOM/state assertions

Flow Tests

- ✓ Signup & checkout
- ✓ Form validation & errors

PDF & Docs

- ✓ HTML → PDF invoices
- ✓ Batch receipts & tickets

- ✓ CMS ops macros
- ✓ Bulk updates (with permissions)

- ✓ INP/LCP capture
- ✓ Warm-cache checks

- ✓ CRON jobs
- ✓ Serverless triggers

Example: screenshot + PDF generator

Run as a CI job or serverless function

```
import puppeteer from 'puppeteer';

(async () => {
  const browser = await puppeteer.launch({ headless: 'new' });
  const page = await browser.newPage();
  await page.setViewport({ width: 1366, height: 900 });
  await page.goto('https://example.com', { waitUntil: 'networkidle2' });
  const hero = await page.$('header .hero, [data-hero]');
  if (!hero) throw new Error('Hero not found');
  await page.screenshot({ path: 'homepage.png', fullPage: true });
  await page.pdf({ path: 'homepage.pdf', format: 'A4', printBackground: true });
  await browser.close();
})().catch(err => { console.error(err); process.exit(1); });
```
